

PIP and Horizon Solutions are proud to introduce *Eva*, the first safety eyewear for women in the workforce!

The construction design of *Eva* safety eyewear provides a better fit for the facial structure of a woman, and provides a more secure fit on the nose. Better fitting eyewear will protect the eyes more effectively.

PIP has partnered with the American Cancer Society, and will be donating a portion of all proceeds to assist in finding a cure for Breast Cancer. Breast cancer has impacted everyone in one way or another, and *Eva* provides a great venue to promote awareness. Please help PIP and Horizon Solutions support this wonderful cause as we provide a **VISION FOR A CURE!**
