from Rockwell Automation.

Connected Components On Tour A Value-Added Training Seminar

Presented by Horizon Solutions and featuring products and services from Rockwell Automation

Holyoke, MA

Monday, April 5th

Holyoke Training Facility
701 Kelly Way
Holyoke, MA 01040
Phone (413) 533-3933
Session 1: 9:00AM - 12:00NOON
Session 2: 1:00PM - 4:00PM
*Lunch will be provided

Connected Components is a solution of core products and essential tools from Rockwell Automation that provide you with the appropriate level of control. With a focus around the core of small machines (MicroLogix™ controllers, PowerFlex™ drives and PanelView™ Component HMIs), the Connected Components solution provides you with pre-developed and time-saving building block tools which include simple speed control and simple temperature control.

Benefit from simplified engineering, simple connectivity and enhanced diagnostics.

The hands-on labs allow you to work directly with Rockwell Automation products and better understand the value of the building blocks which include:

- **Pre-written Control Programs**
- **Sample HMI Screens**
- **Quick Start Guides**
- **Parameter Backup and Restore Functionality**
- **Sample Wiring Diagrams**
- **Sample Panel Layouts**

Horizon Solutions will be offering this seminar in two locations – Holyoke, MA and Albany, NY – and will offer 2 sessions each day, a morning session and an afternoon session.

Albany, NY

Wednesday, April 7th

Albany Training Facility
4 Access Road
Albany, NY 12205
